

To Print From your Laptop

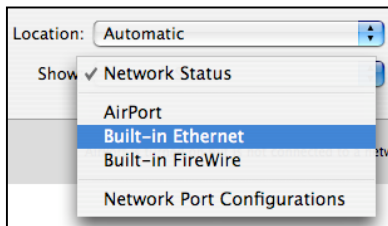

“LR-150” printer setup no longer works. Please reconfigure to the following:

1. Connect the **ethernet cable** to your laptop.  (This will temporarily disable Internet on your laptop)

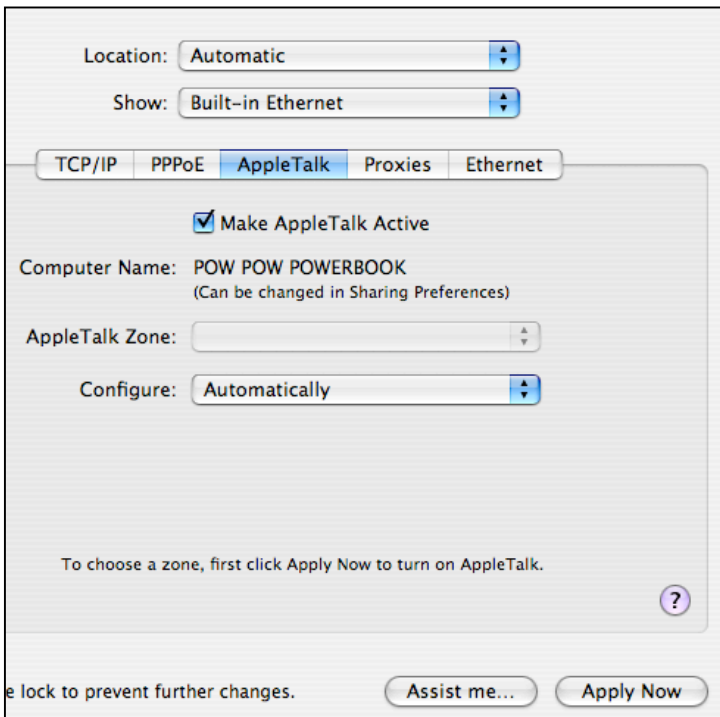

2. Launch **System Preferences**.

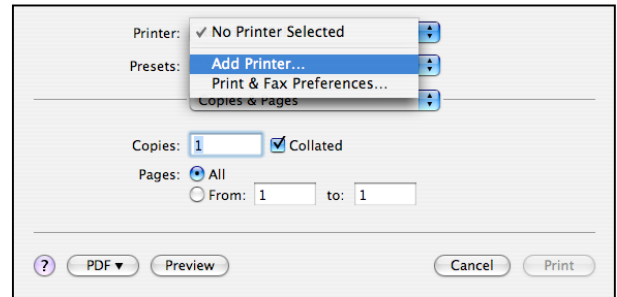

3. Click **Network setup**.

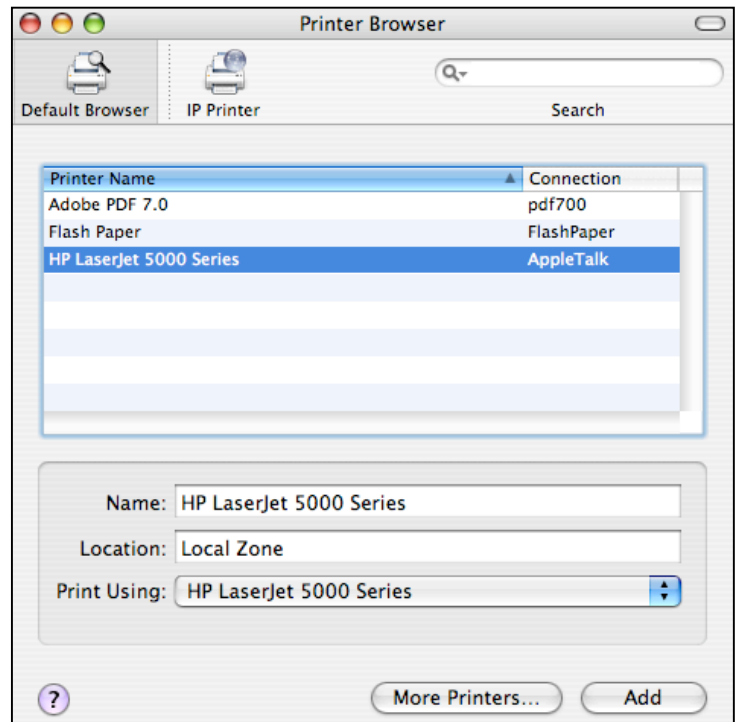

4. Select **Show: Built-in Ethernet**.

5. Select **AppleTalk**.
6. Check the box **Make AppleTalk Active**.
7. Click **Apply Now**.

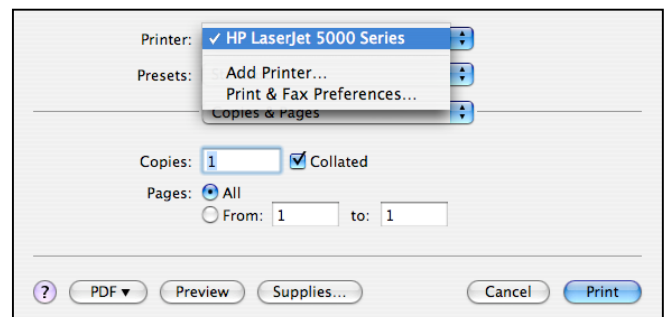

8. In the print window, scroll down the printer list and select **Add Printer...**

9. Click **HP LaserJet 5000 Series**.

10. Click **Add**.

11. Print using the **HP LaserJet 5000 Series**.
